

Site8 - Renewable-Surplus Case Study

SITE8 RL IMPLICATIONS:

Load: 2.14 kWh/h
Solar: 3.24 kWh/h
Coverage: 151.6%

Battery: 21.6 kWh
Autonomy: 14.1h

EXPECTED BEHAVIOR:

- Battery saturates frequently
 - Excess solar curtailed
 - Diesel near-zero usage
- Challenge: night + outage overlap

STRESS TEST VALUE:

Tests policy robustness under
energy-surplus conditions
